MEMORANDUM FOR SEE DISTRIBUTION

SUBJECT: Reporting Equipment Status via ATSCOM Web Page

1. In July 2004, ATSCOM undertook an initiative to create a database of all existing tactical ATS equipment worldwide. This database is intended to be used as a tool for commanders at all levels to monitor equipment status as well as to report it to ATSCOM for follow-on readiness reporting and assistance.
2. The request to report was set forth in message 04-09 dated 12 July 2004. At that time, equipment status was to be reported by emailing a spreadsheet each time the status of equipment changed. Subsequently, we have created an equipment database that streamlines the reporting requirement immensely.
3. At the Sep 04 ATS Leaders Conference, numerous ATS Commanders commented on the excessive time required to get their ATS equipment repaired or to receive assistance for equipment issues. Utilizing the equipment database to update equipment status will allow ATSCOM to monitor unit status and assist as needed.
4. Unfortunately, to date, we are receiving little if any equipment updates on the web database. In order for ATSCOM to properly support your needs, we have to obtain timely and accurate data. Accordingly, I need your support in submitting the equipment status report. The database is located at www.atscom.army.mil, and we are standing by to support and assist you.
5. POC's for this action are Mr. Ron Spires, DSN 558-1642, COMM 334-255-1642, email ronald.spires@rucker.army.mil or Mr. Bill Lepto, DSN 558-1643, COMM 334-255-1643, email william.lepto@rucker.army.mil.

FREEDOM'S VOICE!

J. MIKE SIMMONS
COL, AV
Commanding
